

Nut Holderz

**Tired of your bulkheads coming loose?
Nut Holderz are the solution!**

Nuts just don't stay on there tight enough. No matter how much you tighten them, the bulkhead just keeps spinning. Nut Holderz offer a permanent solution!

Nut Holderz prevent bulkheads from loosening when attaching or detaching hoses or hardlines. They act as a wrench in order to keep your bulkheads in place. However, its much more convenient. Instead of needing to jam a wrench on your bulkhead every time you want to attach or detach a hose or hardline, you just bolt a Nut Holder on there and it stays on permanately!
